Job description

Antriam was created with a vision to develop cost effective but commercially viable solutions. At Antriam, we believe in pushing boundaries, fostering creativity, and delivering unparalleled value to our customers. Join us in our exciting journey as we continue to grow and make a lasting impact and deliver exceptional user experiences!
We are seeking a AWS DevOps engineer to enhance, support and maintain our products currently in use by our customers. This role will be pivotal in creating new solutions that would add to our portfolio.
Our tech stack includes Python, React and services deployed on AWS.
This is an incredible opportunity to join a startup to learn & deliver different aspects of product development lifecycle.

Position: AWS DevOps Engineer

Location: Hyderabad, Telangana, India.

Position Type: Full-time

Responsibilities:

- Design, implement, and maintain AWS infrastructure and services to support scalable, secure, and resilient applications and systems.
- Automate and streamline CI/CD pipelines using tools like AWS CodePipeline, Jenkins, or GitLab CI/CD.
- Implement and manage containerization and orchestration using Docker and Kubernetes.
- Monitor, optimize, and troubleshoot AWS resources, services, and applications to ensure high availability, performance, and reliability.
- Implement and manage infrastructure as code using tools like Terraform or CloudFormation.
- Collaborate with development teams to design and implement automated testing, deployment, and monitoring solutions.
- Implement and enforce security best practices and compliance policies across AWS environments.
- Provide technical guidance and mentorship to junior team members.
- Stay updated with the latest AWS services, tools, and best practices.

Qualifications:

- Bachelors degree in Computer Science, Engineering, or a related field.
- Proven experience as a DevOps Engineer or similar role with a focus on AWS.

- Strong understanding of AWS services (e.g., EC2, S3, RDS, Lambda, IAM, VPC, CloudWatch).
- Hands-on experience with infrastructure as code tools (e.g., Terraform, CloudFormation).
- Proficiency in scripting and programming languages (e.g., Python, Bash, PowerShell).
- Experience with CI/CD pipelines and tools (e.g., Jenkins, GitLab CI/CD, AWS CodePipeline).
- Knowledge of containerization and orchestration tools (e.g., Docker, Kubernetes).
- Familiarity with monitoring and logging tools (e.g., CloudWatch, Prometheus, ELK stack).
- Strong problem-solving skills and attention to detail.
- Ability to work independently and as part of a team in a fast-paced environment.
- Strong communication and interpersonal skills.

Preferred Qualifications:

- AWS certifications (e.g., AWS Certified DevOps Engineer, AWS Certified Solutions Architect).
- Experience with serverless architectures and services (e.g., AWS Lambda, API Gateway).
- Knowledge of microservices architecture and best practices.
- Experience with database technologies (e.g., PostgreSQL, MySQL, MongoDB).
- Familiarity with Git version control and branching strategies.
- Passion for learning and adapting to new technologies.

What We Offer:

- Competitive salary and equity options.
- Flexible working hours and hybrid work opportunities.
- Paid time off and company holidays.
- Professional development and learning opportunities.
- A collaborative and inclusive work environment.
- Opportunity to make a meaningful impact and contribute to the success of the company.
